

AADITYA SURYA

asurya@usc.edu • (213) 783-8000 • www.linkedin.com/in/aadityasurya • www.aadityasurya.com • Los Angeles, CA

EDUCATION

University of Southern California – Los Angeles, CA

Exp. Grad. December 2026

Viterbi School of Engineering and Marshall School of Business

Bachelor of Science, Computer Science and Business Administration (STEM)

Relevant Coursework: Data Structures & OOP, Discrete Math, Advanced Math (Linear Algebra, Differential Equations, Calculus III), Algorithms & Computing, Accounting, Business Finance, Marketing, Operations Management

EXPERIENCE

Frenchy Digital

Los Angeles, California

Technical Product Management Intern

November 2024 – February 2025

- Collaborated with designers, engineers, and stakeholders in Figma, leveraging A/B testing and customer feedback to refine UI/UX and translate research insights into actionable product specifications for a B2B SaaS platform.
- Facilitated design sprints and iterative feedback sessions, applying agile and design thinking practices to prioritize customer needs, improve accessibility, and align product features with both user behavior and business goals.
- Prepared workflows, prioritized backlogs, and developed detailed roadmaps that balanced resource constraints with timelines, ensuring efficient delivery of features that drove measurable improvements in customer experience.

GENISYSAPP

Chicago, Illinois

Product Management Intern

May 2024 – August 2024

- Built and optimized client-facing dashboards with React, Tableau, SQL, and Python, improving data visualization across 5+ projects and enabling stakeholders to make informed product and business decisions.
- Partnered with Oracle ERP and cybersecurity teams to gather requirements, host client discussions, and present tailored product solutions, aligning technical feasibility with customer expectations.
- Developed internal tools such as Slack integrations and project dashboards, strengthening cross-team communication and increasing overall efficiency by 20%.

OneApp Housing

Los Angeles, California

Lead Fullstack Developer

January 2023 – May 2023

- Directed the development of OneApp Housing's MVP, integrating Next.js and React with Typescript and Redux to deliver a scalable platform that improved responsiveness and end-user experience.
- Designed and deployed a secure authentication system with OAuth and JWT, ensuring user trust and data integrity while supporting future product scalability.
- Increased engagement by implementing a MapBox API-API-integrated landing page, streamlining navigation and application processes with Tailwind CSS for a seamless user journey.

RESEARCH AND PROJECTS

Undergraduate Research Fellow

Rochester, New York

RIT Golisano College of Computing and Information Sciences

May 2025 – Present

- Collaborated with doctors to analyze 5–10 million-entry mass spectrometry datasets, focusing on N-linked glycosylation and preparing high-quality data pipelines for model training.
- Applied protein language models (PLMs) such as ESM-2 to generate embeddings from protein sequences, leveraging large language model (LLM) techniques for glycosylation analysis.
- Designed and trained deep learning classification models to predict glycosylation patterns from embeddings, advancing understanding of archael post-translational modifications.

Breast Ultrasound Image Classification Research

Los Angeles, California

Team Lead

June 2023 – January 2024

- Developed a CNN-based tumor classification model using MobileNetV2, achieving 82% accuracy and reducing false positives by 12% through custom loss functions and adaptive optimization techniques.
- Optimized image preprocessing pipelines, enhancing feature extraction and improving model inference time by 30%, ensuring scalability for real-time medical imaging applications. The paper was published in BJUR Vol. 10.
- Deployed multi-GPU distributed training with PyTorch, reducing training time by 40%, and improving model generalizability for deployment in Lesotho, Malawi, and Nepal.

SKILLS & INTERESTS

Skills: Python, C++, Swift, NLP, LLM Tuning (LoRA, QLoRA), Full-stack Dev (HTML, CSS, React), Next JS, Tailwind CSS, Pytorch, Git, SQL, Docker, Tensorflow, Cloud Infrastructure (AWS, Oracle, Firebase), Agentic AI (Langchain, N8N)

Global Experience: Lived in India, Mozambique, South Africa, Lesotho, Malawi, Nepal, United States

Interests: Swimming, Travelling, Poetry, Trekking, Nepali Cuisine, Raspberry Pi, Unnecessary Inventions, Chess

Certifications: Economics & Entrepreneurship (Columbia), Marketing Analytics (UC Berkeley), Big Data & ML (Columbia), Data Science (Harvard), Python (Microsoft), Oracle Cloud Infrastructure Foundations (Oracle)
